

BIOCHEMISTRY MAJOR (BS TRADITIONAL)

Biochemistry majors focus on the chemistry of living systems. The major includes coursework in key fundamental areas of biology and chemistry including molecular biology, cellular biology, genetics, analytical chemistry, organic chemistry, physical chemistry, and a full year sequence of biochemistry. The major pushes students to develop their critical thinking, scientific reasoning, and laboratory skills in a true interdisciplinary way. Students are required to participate in an on-campus research experience as a part of this program.

General Education Requirements

All degree seeking undergraduate students must complete the general education (<http://catalog.csp.edu/undergraduate/academic-information/general-education-requirements/>) requirements.

Degree Requirements

Bachelor of Science (<http://catalog.csp.edu/undergraduate/academic-information/graduation-requirements/#bs>) degree consists of a major of typically 30 to 60 credits, general education courses, upper-level requirements, and elective courses totaling a minimum of 120 credits.
