

EXERCISE SCIENCE (MS)

The Master of Science in Exercise Science is designed to advance the skills and knowledge of current and future exercise science professionals. By utilizing a combination of theoretical inquiry and practical application, students will gain greater insight regarding exercise testing and prescription as they relate to working with diverse populations. Major topics discussed include exercise physiology, exercise testing, applied exercise prescription, biomechanics, nutrition, and metabolism as well as psychology of sport and exercise. This program prepares students to become leaders within the exercise science industry.
