

CHEMISTRY MAJOR (BA TRADITIONAL)

Chemistry majors will gain an understanding of the structure of atoms and molecules, properties of materials, and the reactions that convert one molecule or material to another. The chemistry major prepares students to think critically and quantitatively, reason scientifically, and to understand the experimental methods, techniques, and instrumentation used in chemistry. Students have the opportunity to gain relevant research experience on campus.

General Education Requirements

All degree seeking undergraduate students must complete the general education (<https://catalog.csp.edu/undergraduate/academic-information/general-education-requirements/>) requirements.

Degree Requirements

A Bachelor of Arts degree consists of a major of typically 30 to 44 credits or two minors, general education courses, upper-level requirements, and elective courses totaling a minimum of 120 credits.
